

Indoor Lighting

Lamp Family

The GLED PAR38 spot is an energy efficient alternative to halogen and incandescent lights, up to 6 times more efficient.

This LED PAR38 replacement lamp has superior light quality making it ideal for retail track lighting, showroom, hotel and general office lighting.

The commercial grade thermal design assures long useful life. Choice of color temperatures and beam angles provide flexibility in design and layout.

LEDs create less heat which reduces the use of air conditioning to cool the building thus providing additional energy savings.

Category	Indoor Lighting
Sub Category	Lamps
Item Category	PAR
Product Identification	PAR38
Description	LED retrofit for PAR38 Lamps
Availability Date	Available

Luminous Flux	354 lm (Warm white) 450 lm (True white)
Beam Angle	25 °
Color(s)	Warm White True White
Corrected Color Temperature	3000K (Warm White) 5500K (True White)
Color Rendering Index CRI	70
Wattage	12W
Operating Voltage	24VDC
Line Voltage	90-230VAC
Dimmability	Non-dimmable
Width	4.75 inches (diameter)
Height	4 inches
Base Type	E26
Lens Type	Polycarbonate diffuser
Exterior Material	Metal
Exterior Color	Chrome
Operating Temperature	-40 to +60 C
Storage Temperature	-40 to +80 C
Certifications	RoHS, CE, ETL Listed
Rated Lifetime	50,000 hours
Warranty	3 years
